The following is an examiner's statement of reasons for allowance: The references cited have failed to teach and to make obvious a measurement element for determination of a flow rate of a fluid which is flowing around the measurement element in a flow channel, comprising an optical waveguide carrying an electromagnetic wave along a longitudinal extent thereof; at least two fiber Bragg grating sensors in the optical waveguide; and at least one electrical heating element, arranged adjacent to and applying heat to the optical waveguide, the electromagnetic wave carried by the optical waveguide being influenced, dependent on the flow rate of the fluid, as a function of temperature of the optical waveguide where the fiber Bragg grating sensors are located.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
